

Retractable Barriers

Description

Retractable barriers with retractable belts used for queue management, as well as crowd separation at events. Our retractable barriers have the slimmest bases on the market, to help ensure low-trip hazards.

With a unique anti-wobble base; created by the use of a thread on the pole that attaches all the way through the base and an extra nut on the bottom to create a double lock system that stops wobbling.

Retractable belt lengths: 2 m only.

NB: Poles are sold separately, not as a pair.

Key Features and Benefits:

- Silver pole and base, with black belt
- 2m long Belt Cassette
- Height - 900mm
- Base Diameter - 350mm x 13mm
- Base Weight - 9kg solid metal
