

Acousta Matting

The BCA compliant acoustic underlay for areas where sound proofing and reduction in impact sound is imperative.

Description

Acousta Rubber Underlay Matting is designed for areas where soundproofing and reduction in impact sound is imperative, such as high-rise units, multi-story townhouses and homes, gymnasiums, schools halls and music studios.

It's 850kg/m³ density makes it suitable for use under rigid top surfaces and ceramics with a screed bed.

Surface recommendations include solid timber over plywood, engineered timber floating, engineered timber direct stick, laminate floating, laminate direct stick, vinyl plank direct stick, ceramic direct stick, carpet over carpet underlay and carpet tiles direct stick.

Key Features

- Soundproofing
- Impact sound reduction
- 850kg/m³ density
- Tested in CSIRO laboratory conditions
- Can be recycled at the end of its work cycle
