

Safety Grip Tubular Mat

Where anti-fatigue properties combine with good drainage and excellent traction.

Description

Our Safety Grip Tubular Mat is designed as an open grid square profile PVC tubes welded to PVC under-bars, which aids anti-fatigue properties and promotes safety. Thanks to this open grid design, this premium flooring solution actively dissipates spillage in the workplace, while the diamond-tread surface texture on top side of this mat also aids in slip resistance. Under the hood of our Safety Grip Tubular Mat, textured under-bars work to control mat movement.

KEY FEATURES

- Can be connected sideways
